Summary

Computer Science graduate (CGPA: 3.84) with skills in Python, Java, Flutter, SQL, UI/UX design, and data analytics. Experienced in developing IoT and web-based applications, including SmartShell, a real-time mobile-integrated solution. Completed a 7-month internship at Advanced Energy Industries, contributing to digitalization, quality control system development, and process automation initiatives.

Education

- **Bachelor of Computer Science (Human Centered Computing)** 2022-2026
  Universiti Utara Malaysia *Sintok, Kedah*
  - CGPA: 3.84/4.00
- **Matriculation in Pure Science** 2021-2022
  Matriculation College Perlis *Arau, Perlis*
  - CGPA: 3.88/4.00

Experience

- **Quality Intern** April 2026 – October 2026
  Advanced Energy Industries *Penang, Malaysia*
  - Planned and developed a web-based In-Process Quality Control (IPQC) system to digitize manual audit records.
  - Automated reporting workflows and performed comprehensive data analysis using SAP and Excel VBA to enhance data tracking and auditing efficiency.
  - Assisted in developing a Production OQA Power BI dashboard with the Philippines IT team, utilizing Power Query for data extraction and transformation.

Skills

Languages: Python, Java, Dart, C++, PHP, SQL, JavaScript, HTML/CSS, VBA
Frameworks: Flutter, React.js, Streamlit, OpenCV, Pandas, Scikit-learn
Others: Git, Docker, Firebase, CPanel, Power BI, Power Query, Excel, SAP, Figma, JIRA, Playwright, Selenium
Soft Skills: Team Collaboration, Public Speaking, Technical Writing, Project Management

Projects

- **Web-Based In-Process Quality Control Tracking System** 2026
  - Developed a web-based system to digitize manual IPQC audit records and centralize quality finding management.
  - Implemented record management, dashboards, multi-select filtering, role-based access control, status tracking, and audit history.
  - Translated manufacturing quality workflow requirements into user-friendly system functions for finding assignment, iCAR submission, and closure.
  - *Tech Stack: React.js, JavaScript, SQL, HTML/CSS.*

- **SmartShell: Turtle Nest Monitoring System** 2025
  - Developed an IoT system with ESP32, DHT22 sensor, and relay modules to monitor and control turtle nest environments.
  - Built a Flutter mobile app integrated with Firebase for real-time temperature and humidity monitoring.
  - *Tech Stack: Arduino, Dart, Flutter, Firebase.*
- **SmartEcoRain: Rainwater & Tank Monitoring** 2025
  - Developed an IoT system for automating rainwater collection and tank-level monitoring.
  - Built a real-time dashboard and remote pump control interface using *Flutter* and *Arduino (ESP32)*.
  - Tech stack: *Dart*, *Arduino*, *Flutter*, *MySQL*, *PHP*, *Fritzing*.
- **Malaysia Foreign Arrival Dashboard** 2025
  - Designed an interactive dashboard to visualize Malaysia's foreign arrival trends (2020–2023).
  - Developed data visualizations and forecasting models using *Streamlit* and *Python*.
  - Integrated historical data analysis and predictive modeling for travel trend forecasting.
  - *Tech Stack: Python, Streamlit, Pandas, Scikit-learn, Matplotlib, Seaborn.*
- **Virtual Mouse Using Hand Gesture Recognition** 2024
  - Developed a computer vision system enabling mouse control via webcam-captured hand gestures.
  - Integrated *MediaPipe*, *OpenCV*, and *PyAutoGUI* to detect hand landmarks and implement gesture-based commands (cursor movement, clicks, scroll).
  - Designed robust gesture recognition for intuitive and touchless user interaction.
  - *Tech Stack: Python, MediaPipe, OpenCV, PyAutoGUI.*

Extracurricular

- **Lab Associate** 2025 – February 2026
  MCMC-UUM Makerspace, School of Computing
  - Actively participated in technical workshops and innovation projects within the Makerspace community.
  - Collaborated with peers on IoT and software development initiatives using lab resources.
- **Knowledge Sharing: AI & IoT (UUM Global Outreach)** 2025
  Digital Innovation Camp, Rajamangala University *Thailand*
  - Represented UUM as a speaker, presenting on IoT and the development of **SmartShell**, an IoT-based environmental monitoring project.
- **Design Dash: The 24-Hour UI/UX Quest with CDX Bank Islam** 2024
  Universiti Utara Malaysia (UUM)
  - Participated in a 24-hour UI/UX design hackathon, focusing on rapid prototyping and user-centered design strategies.
